

Drone Reconnaissance (ISR) Solution

Used by multiple armed forces, defense, and security organizations, ZeroTier's ultra-fast, highly secure network platform exceeds the challenging communication needs of today's military organizations.

**Defense-Grade
Cryptography**

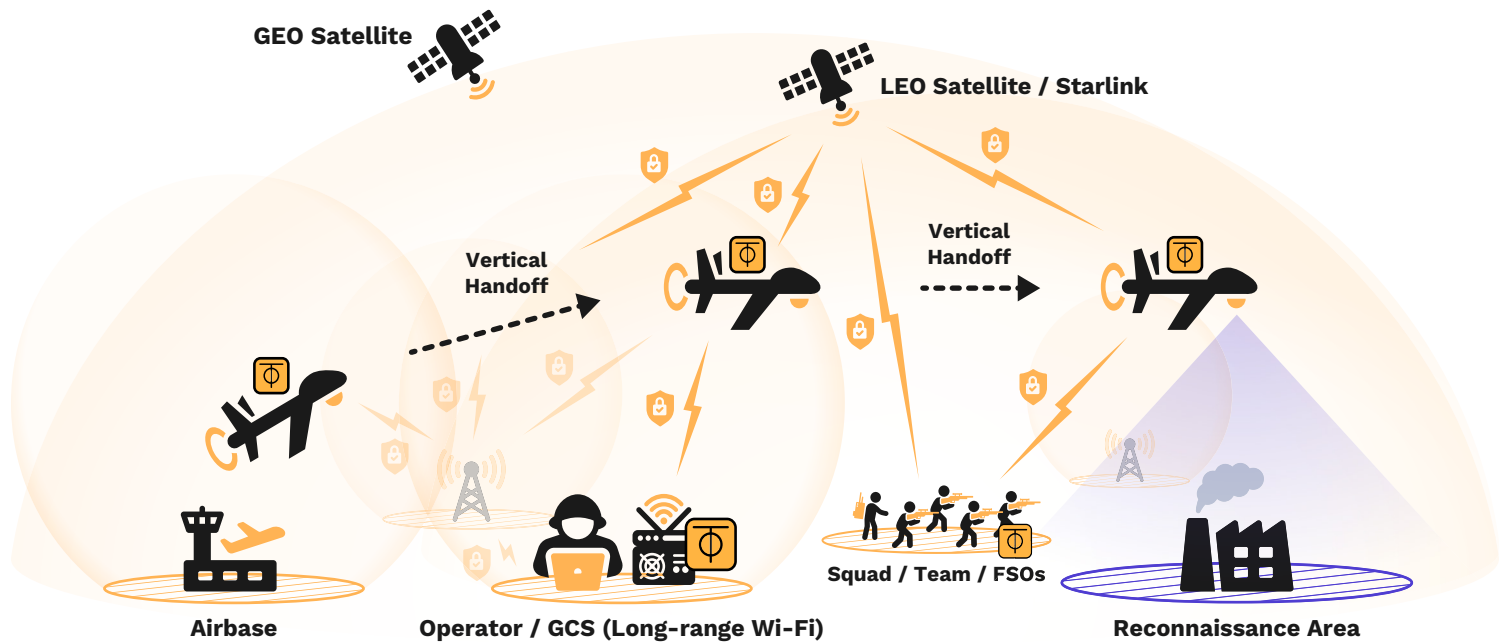

**Lowest Latency
on the Market**

**Fully Self-Hosted
& Air-Gapped**

**Hardware &
Vendor Agnostic**

“We have battlefield tested all options, and ZeroTier is the only solution fast enough for a drone pilot to confirm a kill target.”

— **CONFIDENTIAL CEO** of a European Military Drone Supplier

Key Use Case Features

- Battlefield tested, resilient and self-healing SDN mesh-networking
- AES FIPS-140 or PQC FIPS-203 encryption
- Industry-leading multi-pathing and multi-homing for planned handovers and failovers
- Multi-domain and multi-layer capability
- Ready support for standard hardware and communications platforms
- Fully adaptable software-based platform with an API that can fit into any tech stack
- Available solutions and customer success integrations team
